## Frequently Asked Questions

**Q.** My area rug has a rippling effect on the edges?

**A.** Wool area rugs have a rippling effect on the edges after cleaning. This will relax out after a few days of regular wear and usage.

**Q.** After using the Low Moisture -No Rinse- Carpet Cleaner, my carpet feels dry and crunchy.

**A.** You likely used too much of the Low Moisture -No Rinse- Carpet Cleaner. The dry, crunchy feeling will dissipate after a few days of normal wear and usage. To avoid this from happening again, we would recommend using less. Try not to use more than 1 bottle of diluted solution per 250 sq. ft.

**Q.** I have tough stains on my carpet?

**A.** Use the Bonus Carpet Scrub 'n Stain™ Removal Pad to remove your toughest stains quickly and easily. First pretreat the area with the Activating Pretreater Carpet Stain & Odor Remover and wait for several minutes. Then go over the spot with the Carpet Scrub 'n Stain™ Removal Pad and the Low Moisture -No Rinse- Carpet Cleaner.

## Frequently Asked Questions

**Q.** My **Sonic Duo™ Pro** leaves a foam on hard floors.

**A.** The **Sonic Duo™ Pro** Hard Floor Cleaning Pad is likely too saturated. Replace it with a clean, dry pad.

**Q.** My floors appear cloudy after cleaning.

**A.** The **Sonic Duo™ Pro** Hard Floor Cleaning Pad may be dirty. Change the pad.

**OR**

**A.** The **Sonic Duo™ Pro** Hard Floor Cleaning Pad was washed with a powder detergent and may be damaged and require replacement. Never use powder detergents. Only use liquid detergent to launder the cleaning pads.

**OR**

**A.** The **Sonic Duo™ Pro** may have been left in the same spot for too long with a wet cleaning pad. Never leave the unit with a wet pad in one spot for too long.

**OR**

**A.** This may be leftover from past cleaners that were used on the floor surface. Use the **Sonic Duo™ Pro** a few more times and see if the leftover cloudiness is removed. If this does not work, we suggest rinsing the floor with water and letting it dry. One or more rinses generally removes the residue. A more stubborn case may require you to rinse the floor with a mix of one part vinegar to 2 parts water. Then use the **Sonic Duo™ Pro** again with a clean pad.

**Q.** How can I remove tough stains and tough dried on dirt.

**A.** To remove tough stains and dried on dirt, we recommend using the ScrubDuster™ tool with the Scrubbing Pad. Just attach the pad, extend the wand and clean away your toughest spots. (See page 9 for assembly.)

### Polishing Your Hard Floors:

**1** Vacuum the floor to remove all loose dirt, dust and grit from the floor surface. For best results, we recommend that you clean the floor using the **Shark®** Hard Floor Cleaner first and allow time to dry before polishing.

**2** Attach the Hard Floor Polishing Pad to the bottom of the **Sonic Duo™ Pro**. This pad has a "Orange" trim and the "Orange" tag says "Hard Floor Polishing Pad". (Fig. 22)

**3** Lightly step on the back of the scrubbing head to release the handle.

**⚠ WARNING:** Never stand on the **Sonic Duo™ Pro**.

**4** Carefully, squirt a liberal amount of the Floor Polish onto an area of the floor to be polished and place the polishing pad over it before you start the unit. Make sure that the polishing pad is saturated and then squirt the polish in 5'x5' sections. (Fig. 23)

**5** Turn the On/Off button to "(I) Hard Floor" mode. Always squirt the floor polish from a height of 6 inches above the floor to avoid splashing the polish over the floor. One bottle is enough to cover 425 square feet. (Fig. 24)

**6** Use the **Sonic Duo™ Pro** to spread the polish evenly over the floor. Do not go over an applied area too frequently. Always leave an area looking wet. If a section begins to look dry while polishing, add more Hard Floor Polish to the area. Repeat until the whole area has been polished.

**7** When going from section to section, do not lift the **Sonic Duo™ Pro** to move it, always slide it to the next section. No rinsing is required.

**8** Allow the Hard Floor Polish to dry for at least 1 hour in light traffic areas and a complete 24 hours for the polish to cure before returning to heavy traffic areas.

**9** When finished, turn the unit off and slide and lift the **Sonic Duo™ Pro** to remove it from the area that was just polished. Lay the **Sonic Duo™ Pro** on its side and remove the Hard Floor Polishing Pad by hand. (Fig. 25)

**NOTE:** Depending on the amount of traffic your floors sustain, **Shark®** recommends polishing every 2 months. Touch up high traffic areas as needed in-between full floor polishes.

**! IMPORTANT:** Do not use on unsealed wood or unglazed ceramic floors. Do not use on wood or tile floors that are highly worn, unfinished or have a wax or oil finish. Surfaces that have been treated with wax or some no wax floors may be damaged by the cleaning and polishing solutions therefore it is always recommended to test an isolated area of the surface to be cleaned or polished before proceeding. You should check the use and care instructions from the floor manufacturer before cleaning or polishing.

**! IMPORTANT:** Do not use more than one brand of floor polish to polish one room. Use only **Shark®** Hard Floor Polish.

fig. 26
